

## Contact

### Phone

9123885967

### Email

ad.ayandutta@gmail.com

### Address

Kolkata, West Bengal

## Skills

### • Technical skills :

- Programming: Python  
JavaScript, Java
- DSA: Arrays, Strings,  
Hashing, Recursion,  
Sorting, Searching
- Web: HTML5, CSS3,  
JavaScript.
- Database: SQL
- Tools: Git, GitHub, VS  
Code
- IoT: Arduino, Sensors,  
Bluetooth Module, Relay

### • Soft skills:-

- Time Management.
- Leadership.
- Effective  
Communication.
- Critical Thinking.

## Language

**English** - Professional

**Hindi** - Fluent

**Bengali** - Native

# AYAN DUTTA

B.Tech graduate in Electronics & Communication Engineering with strong fundamentals in Digital Electronics, Communication Systems, and Embedded Systems. Proficient in DSA, SQL, and web technologies, with hands-on experience in JavaScript-based projects and IoT applications using Arduino. Seeking an entry-level Software / IT or ECE-related role to apply problem-solving and technical skills.

## Projects

### ○ Music Player

HTML,CSS, JavaScript

- Developed a responsive web-based music player using HTML, CSS, and JavaScript.
- Implemented play/pause, next/previous, progress bar, volume control, and playlist features.
- Designed a modern dark-themed UI and handled audio playback using JavaScript DOM manipulation.

### Python Desktop Assistant

**Libraries:** SpeechRecognition, pyttsx3, PyAudio, OS, Webbrowser

- Python, Speech Recognition, Text-to-Speech, Automation
- Developed a Python-based desktop voice assistant capable of performing system-level and web-based tasks using voice commands.
- Implemented speech recognition for command input and text-to-speech (TTS) for interactive responses.
- Integrated Python libraries for system control, web browsing, and task execution to improve productivity.

### Smart LED Bulb – (Third Year Project)

Arduino, Bluetooth Module ,Relay Control,Voice Control

- Engineered a voice-activated smart lighting system enabling users to switch household lights on/off via spoken commands.
- Integrated Arduino microcontroller, Bluetooth module, and relay circuits for safe and responsive device control.
- Linked the system to a mobile voice assistant app, ensuring seamless command processing and signal transmission.
- Designed efficient relay switching logic to guarantee safety, reliability, and low power consumption.
- Delivered a cost-effective, scalable automation solution for everyday household tasks, demonstrating practical IoT applications.

### IoT-Based Weather Monitoring System (Final Year Project)

Arduino UNO, Sensors (Temperature, Humidity, Pressure)

- Developed an IoT-enabled environmental monitoring system to track real-time climate conditions with high accuracy.
- Implemented sensors for temperature, humidity, and atmospheric pressure, displaying readings on an LCD for quick visibility.
- Designed system architecture with potential cloud integration, enabling remote monitoring and data logging.
- Created a portable, low-cost solution suitable for smart agriculture, environmental research, and scalable IoT deployments.
- Showcased ability to combine hardware prototyping with IoT concepts, bridging embedded systems and real-world applications.

## Education

**B.Tech.—Electronics and Communication Engineering**

Techno International New Town | Board-MAKAUT | YOP– 2025 | CGPA:- 7.32

**12th-Science**

Gobindapur Ratneshwar High School| Board-WBCHSE |YOP-2021|

**10th-General**

Madarat Popular Academy| Board-WBBSE | YOP-2019|
